

How to install ChemDraw for Windows

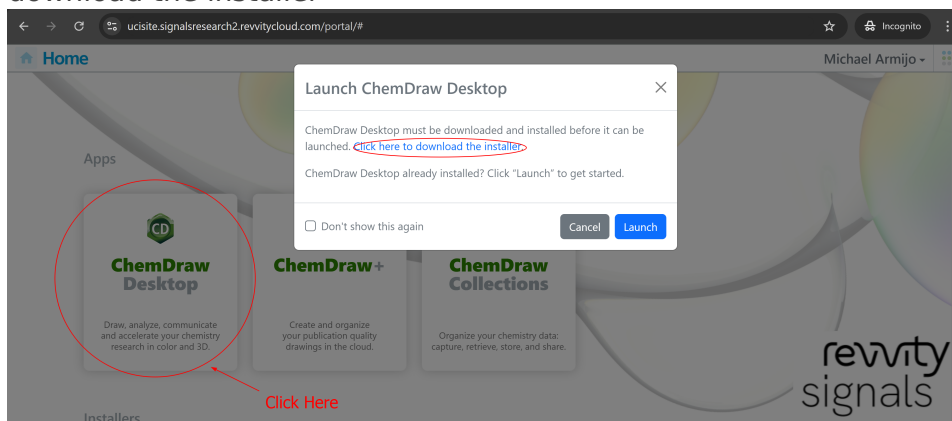

1. After you request the license via <https://ps.uci.edu/software/chemoffice> -> <https://tools.ps.uci.edu/signals/>, you will receive two emails from Revvity: one welcoming email and one for the password reset. Please follow the link in the password reset email.

2. Go to <https://ucisite.signalsresearch2.revvitycloud.com> and sign in with your username (which is your ucinetid@uci.edu and your password from the previous step)

- Click "ChemDraw Desktop" on the product, on the pop up windows, click on "Click here to download the installer"

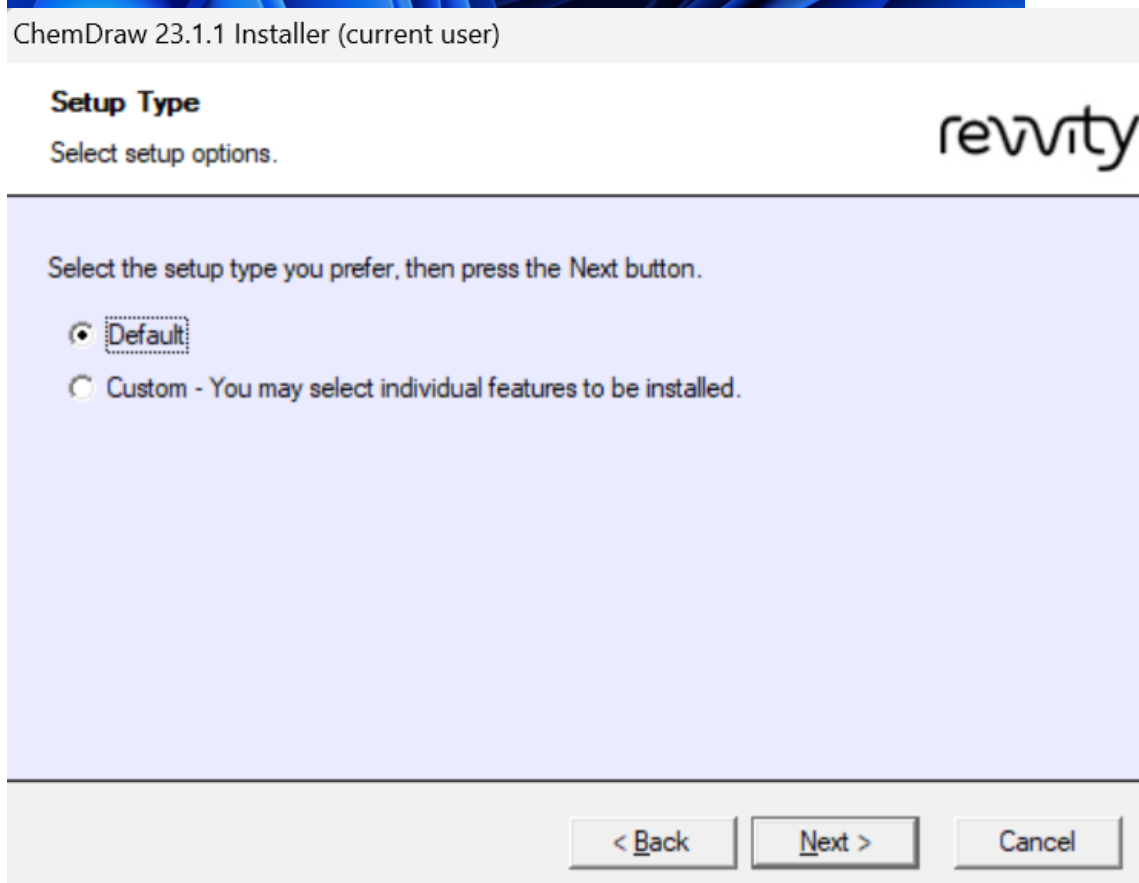

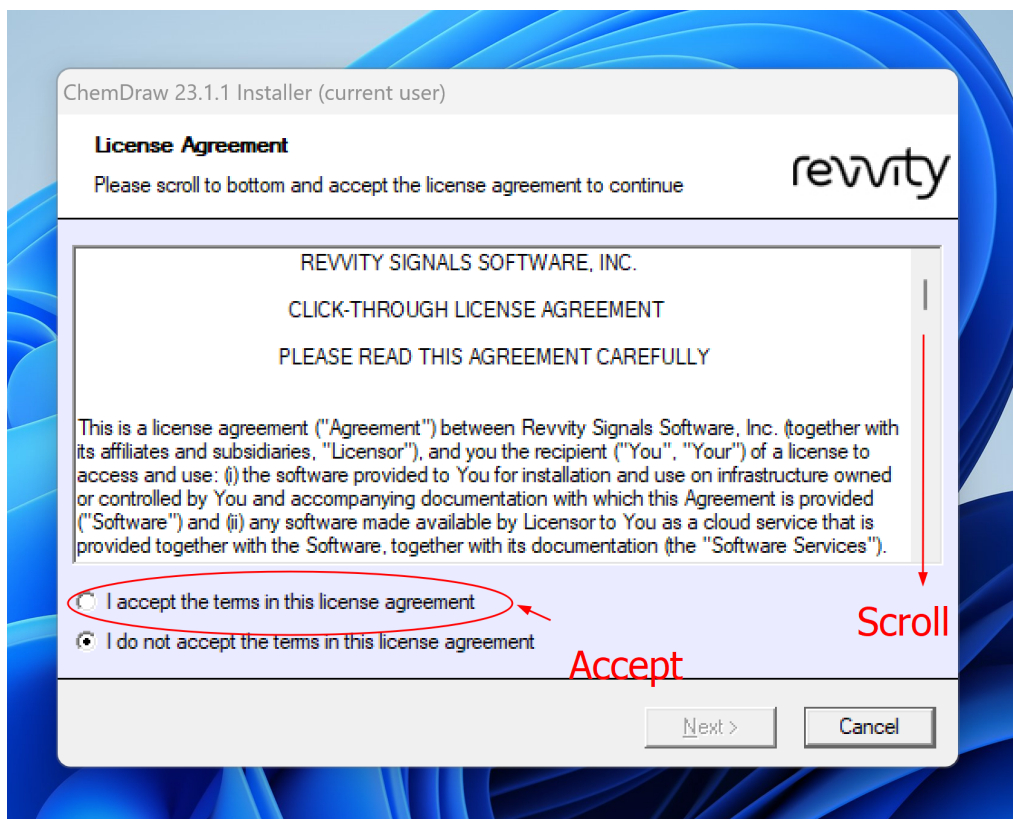

- Download the software
 - It should be called something similar to "ChemDraw_xx.x.x.exe"
- Double click on the file you downloaded
- Click on "OK" on the extraction path or set your preferred path and then click "OK"

7. Click on the "Next" button

8. Read and Accept the "License Agreement"

ChemDraw 23.1.1 Installer (current user)
