Tutorial

1. Plug in the flash drive that contains the Windows 10 Installer.

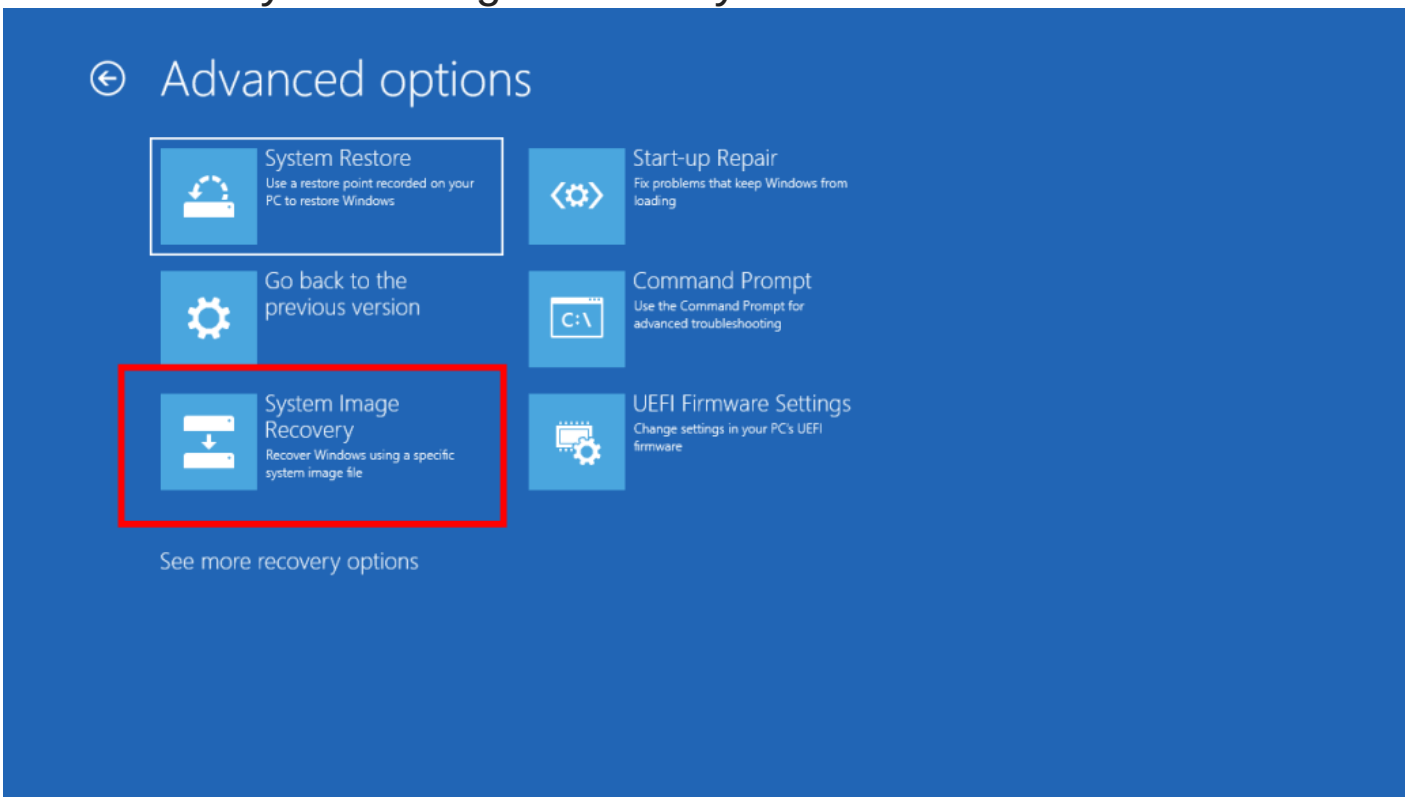

2. Press the power button on the laptop, and press ESC while booting to get to the boot device selection menu. Choose the flash drive and hit enter.

3. Click the repair option in the bottom left.

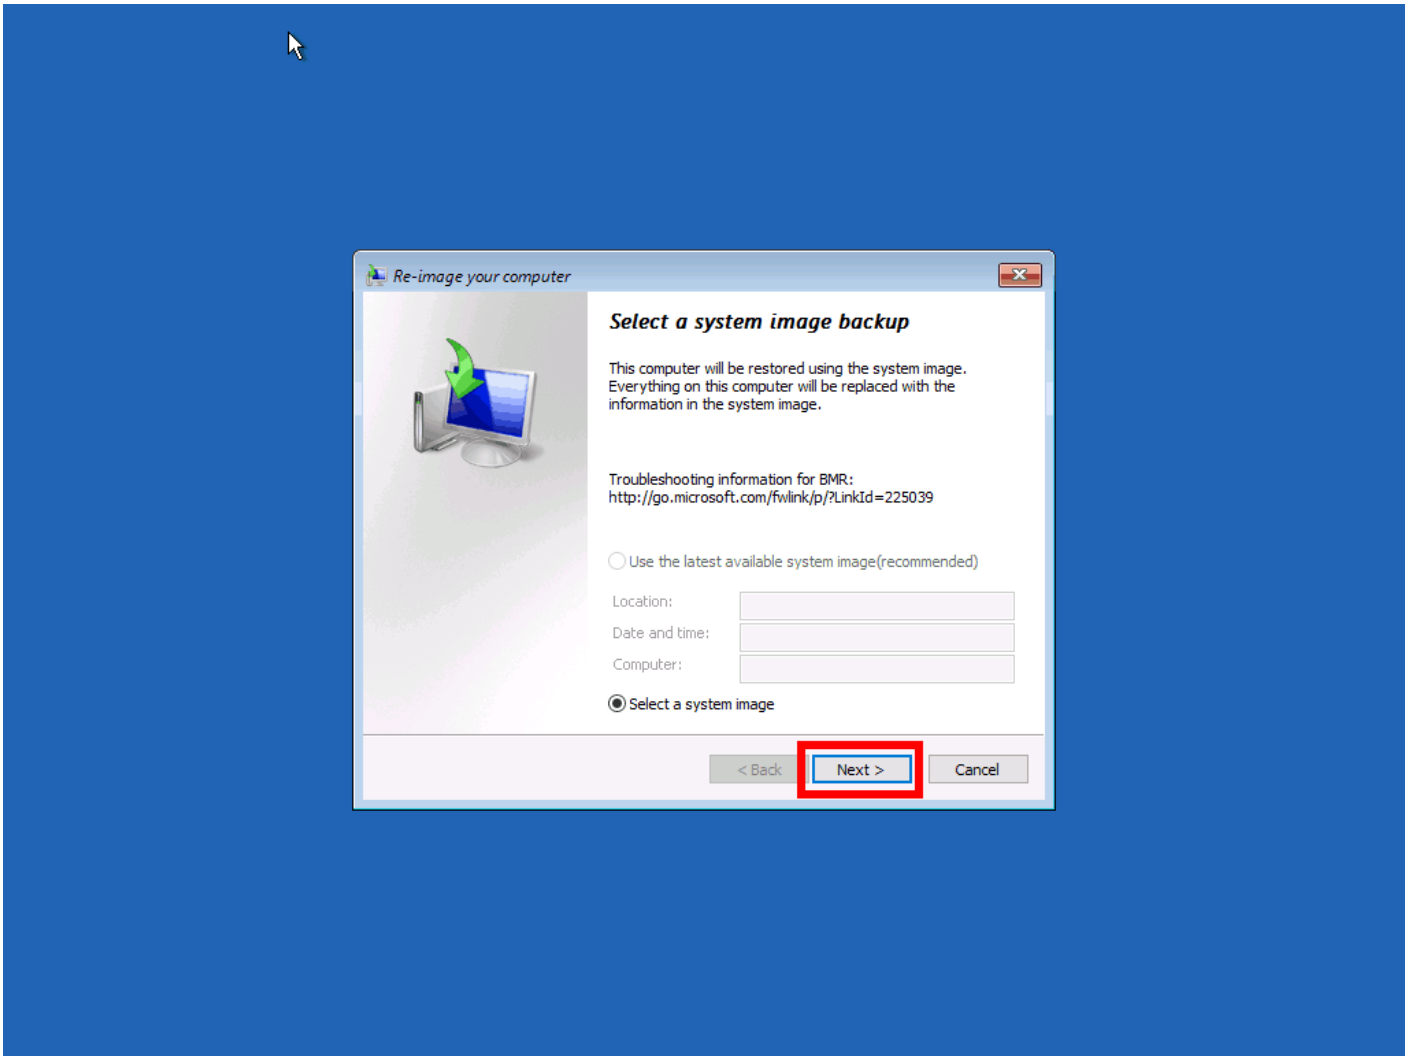

4. Choose System Image Recovery

5. Plug in the hard drive with the image on it.

6. Click "select a system image" and then choose the image.

7. Once the process has finished, reboot.

8. Open the notes - serials text file on the desktop and use the license codes there to activate Spartan and Odyssey (Help -> License Utility -> paste the serial code)

9. Make sure the software has been activated and works correctly. If it does not, then please contact Physical Sciences Computing Support group at pscsg@uci.edu

10. Delete the "Delete now.txt" file on the Desktop to signify that the laptop is ready.
